

6.3 WRITE A “PERSON” CLASS TO HOLD ALL DETAILS.

```
class Person
{
    constructor(Name, DOB, Fathername, Mothername, Qualification, Placeofresidence,
Emailid, Phonenum)
    {
        this.name = Name;
        this.DOB = DOB;
        this.fathername = Fathername;
        this.mothername = Mothername;
        this.qualification = Qualification;
        this.residence = Placeofresidence;
        this.emailid = Emailid;
        this.phonenum = Phonenum;
    };
}
var Per = new Person("Vignesha S", "18/11/2002", "A S Shanmugam", "Amutha S", "B.C.A",
"Chittoor, Andhra Pradesh", "svignesha18@gmail.com", "8341495313");
console.log(Per);
```

OUTPUT:

```
[Running] node "c:\Users\vicky\OneDrive\Desktop\zen\EXAMPLE.JS"
Person {
  name: 'Vignesha S',
  DOB: '18/11/2002',
  fathername: 'A S Shanmugam',
  mothername: 'Amutha S',
  qualification: 'B.C.A',
  residence: 'Chittoor, Andhra Pradesh',
  emailid: 'svignesha18@gmail.com',
  phonenum: '8341495313'
}
```
